Malek Aziz Hassayoun

AI Engineer | Cybersecurity & Offensive Automation | LLM Systems

+216 53 117 541 | malekaziz.hassayoun@esprit.tn | malek-hassayoun | m2l33k | malekhassayoun.vercel.app | Credly

Final-year Software Engineering student at ESPRIT with a strong track record in **AI systems**, **multimodal learning**, and **LLM architectures**. Built real-world impact across **6+ internships** in cybersecurity automation, blockchain research, and AI instruction — currently contributing to Huawei's global R&D (Apr 2026). Ranked in the **top 6% on TryHackMe**, active IEEE project contributor, and open-source author. Driven by a passion for XAI, federated learning, and AI-powered security systems.

PROFESSIONAL EXPERIENCE

Cloud Core Network Intern — **Apr 2026 – Present**
Huawei — *Lac 2 / Tunisia*

- Joined Huawei's global R&D pipeline contributing to **2 active AI engineering workstreams** within the first month
- Mastered the proprietary cloud-native stack in **under 2 weeks**, reaching independent task delivery ahead of schedule

Professional AI Instructor (Part-time) — **Jan 2026 – Present**
TCodeX (TeachCode X) — *Remote*

- Instructed **100+ students** across LLMs & RAG, Prompt Engineering, AI Agents, and AI-driven cybersecurity, sustaining a **90%+ completion rate**
- Produced a **72-hour full-pack curriculum** across **8 modules**, cutting onboarding time by **30%**; validated through personal **NVIDIA certification** completion in Deep Learning, RAG Agents, NLP, and Anomaly Detection
- Supervised **12+ capstone projects**; **4 shipped** as open-source tools on GitHub

Freelance Security & Architecture Consultant — **Jan 2026 – Present**
Self-Employed — *Remote*

- Conducted security audits for **3+ clients**, uncovering an average of **8 critical vulnerabilities** per engagement with full remediation roadmaps
- Planned secure cloud architectures improving infrastructure resilience scores by **35%** on average

AI-Powered Web Pentesting Intern — **Jun – Aug 2025**
OXYNAS — *Paris / Remote*

- Engineered an AI pentesting agent that **cut manual testing time by 60%** and flagged **85% of OWASP Top-10 threats** autonomously
- Systematised the vulnerability-to-report pipeline, compressing report generation from **4 hours to under 45 minutes**

Blockchain & AI Research Intern — **Jul – Sep 2025**
ESPRIT Research Lab — *Tunis, Tunisia*

- Developed a decentralised smart grid security system; realised **49.5 ms benchmark latency** for AI anomaly detection, **32% below** target
- Authored internal research report adopted as reference architecture for two follow-on lab projects

WiFi / Bluetooth Pentesting Intern — **Jun – Aug 2024**
ESPRIT — *Tunis, Tunisia*

- Executed **15+ wireless attack scenarios** (WPA2 cracking, BLE sniffing, deauth floods); documented findings in a structured threat model
- Deployed countermeasures that **reduced the wireless attack surface by 40%**, confirmed through independent re-testing

Web Application Pentesting Intern — **Jun – Sep 2024**
TALAN Tunisie — *Tunis, Tunisia*

- Mechanised OWASP ZAP scans with custom Python scripts across **10+ web targets**, lifting cycle efficiency by **40%**
- Uncovered **23 actionable vulnerabilities** — including **3 high-severity SQLi** — and delivered remediation reports to dev teams

Junior Career Center Assistant (Volunteer) — **Jan 2024 – Dec 2025**
ESPRIT Career Center — *Tunisia · On-site*

- Co-organised **6 career events** (job fairs, company forums, mock interviews) reaching **500+ student attendees**
- Reviewed CVs and coached **100+ students** on professional positioning, contributing to improved internship placement rates

SELECTED PROJECTS

Cognicare – AI Digital Health — **Dec 2025**
Next.js 14 · FastAPI · Phi-4 Multimodal · OpenCV — *IEEE / Open-source*

- Attained **92% diagnostic accuracy**; lifted user engagement by **35%** via real-time gamified therapy tracking

Code Arena AI – Multi-Agent Tournament — **Nov 2025**
Python · Ollama · Llama 3.1 · GPT-4o · Flask — *Personal*

- Orchestrated a **3-model hybrid MAS**; Human-in-the-Loop control cut problem-solving latency by **28%** vs. single-agent baseline

ISO 9001 ERP – Quality Automation — **Oct 2024 – May 2025**
SpringBoot · Angular 19 · PostgreSQL · Docker · K8s — *Cocosunult*

- Slashed documentation overhead by **60%**; compressed audit-preparation cycles **5×** via end-to-end process mechanisation

Cyber Sentinel – Security Platform — **2024**
Python · Semgrep · Nmap · AI/ML — *Personal*

- Unified code scanning, network recon, and AI vulnerability scoring; reduced manual triage time by **50%**

TECHNICAL SKILLS

AI & ML: Phi-4, Llama 3.1, RAG, PyTorch, Transformers, CV, XAI, Federated Learning, LLMOps, n8n

Cybersecurity: Pentesting, OWASP ZAP, Metasploit, Nmap, Burp Suite, Snort, Suricata, Wireshark, DevSecOps

Development: Python, Java, SpringBoot, Angular 19, React, Next.js, Node.js, Docker, Kubernetes, Web3

Data & Research: EDA, Model benchmarking, Literature review, Experimental evaluation

CERTIFICATIONS

Hedera / Blockchain: HBF *Apr 2026* · HCF *Apr 2026* · Hashgraph Developer

NVIDIA: Deep Learning · RAG Agents · Custom LLMs · Anomaly Detection · NLP · Diffusion · Predictive AI · Jetson Nano

Cisco: Ethical Hacker · Cybersecurity Essentials · Junior Cyber Analyst · Networking Basics

Others: Oracle AI Vector · AWS Cloud · GitHub Foundation · AppSec (CAP) · Scrum · IBM Data Viz · Python 1

EDUCATION

Ingénieur Génie Logiciel — Master Level — **2023 – Present**
ESPRIT — École Supérieure Privée d'Ingénierie — *Ariana, Tunisia*

- Advanced AI & LLM Systems, Cloud-Native DevSecOps, Cybersecurity

Global AI Education Program — **Sep – Nov 2025**
Samsung Innovation Campus — *Online*

- ML Foundations, Statistics, Mathematics for AI

Preparatory Studies for Engineering — **2020 – 2023**
Faculty of Sciences, Monastir — *Tunisia*

SOFT SKILLS

Interpersonal: Leadership · Communication · Teamwork

LANGUAGES

Arabic: Native | **English**: B2 Professional | **French**: B2 Professional
